

Siddhanta Knowledge Foundation

Manuscript-deciphering Project

Call for Experts in Ancient Indic Scripts

Siddhanta Knowledge Foundation (**Siddhanta**) has developed a crowd-sourced Web platform for rapid deciphering of Bharat's heritage manuscript collections. The platform called **Siddhantakosha.org**, blends the latest AI techniques with a facility for manual deciphering and proof correction of digitally scanned handwritten manuscripts to achieve 100% accurate content.

This platform provides a **mobile-friendly web interface** for experts in Ancient Indic scripts to type or correct text by looking at the original image. The experts can work from anywhere with an internet connection. Hundreds of experts can decipher different portions of a manuscript in parallel, and verify other's work.

Siddhanta has thousands of folios of digitized manuscripts to be deciphered. It invites experts to type their text and will be paid by the number of pages converted.

Eligibility

Candidate must have

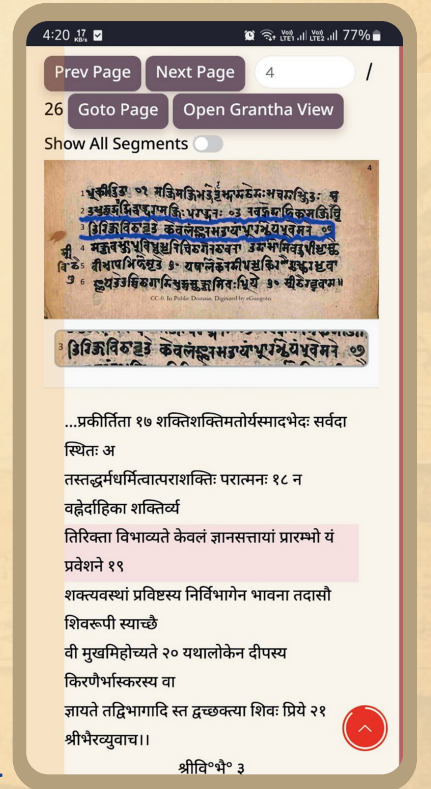

1. a valid email id,
2. basic familiarity with typing in Indic languages, especially devanagari.
3. the ability to read any of the following Ancient scripts and type it in Devanagari script

On a computer or Smartphone:

1. Grantha, Nandinagari, Devanagari, Newari, Modi, Telugu, Kannada

Engagement Process

1. Candidate will be given access on **siddhantakosha.org** to two pages of a manuscript in a chosen ancient script.
2. Candidate must type the text in a modern Indic script on the platform.
3. Upon checking the accuracy of the work, the candidate will be assigned a 10-page chunk for deciphering in 4 days.
4. Upon successful completion, larger work will be assigned on paid basis.
5. Payment will be made based on accuracy and prompt completion of work.
